Catalogue #24
FLOWERS
WITH SPECIAL SECTIONS ON
ROSES, ORCHIDS, SUCCULENTS
AND “LANGUAGE OF FLOWERS” BOOKS

May 2017

Dear Customers and Friends,

Springtime! Flowers bloom and all seems refreshed! In this catalogue we feature books on flowers and flower monographs. In addition, we include flower periodicals, a few seed catalogues, and over a dozen “language of flowers” books. We also offer a 19th century nurseryman’s catalogue from a Canadian nursery with both Canadian and American customers. These salesman’s catalogues are increasingly hard to find as they are broken up for their color plates.

The catalogue is divided into several sections. The first includes books on all types of flowers and is arranged alphabetically by author. But for those of you who have a primary interest in either roses, orchids or succulents (including cacti), we have listed books on those topics separately, so please skip ahead to the dedicated sections on these plants. In addition, we have a group of “language of flowers” books at the very end where you’ll find enchanting ways to communicate with your loved ones this season using 19th century flower symbolism!

We hope that you will enjoy reading through the catalogue and picking out some nice items for yourself or as special gifts for others. Most of the titles included in this catalogue are available only in single copies and so to avoid disappointment we suggest you order as early as possible.

Best regards,
Bradford Lyon & Joanne Fuccello

CYCLOPAEDIA OF BOTANY

9. Brook, Richard - **NEW CYCLOPAEDIA OF BOTANY AND COMPLETE BOOK OF HERBS: Forming a History and Description of All Plants, British or Foreign.** 2 volumes. Hand-colored frontispiece of "Flora" (a female seated figure holding a bouquet), 97 numbered colored plates, most with six figures per plate, and a double-page plate of Linnaean classes (considered Plates #99 and #100), thus a total of 100 colored plates. Decorative title printed in blue and black plus a printed title. pp.(1-title), lix, 348: 349-733. Bound in ¾ brown morocco with gilt titles on spine, marbled boards. Original wraps for all but two numbers have been bound in at the end of Vol. 2. London 1851 - circa 1854. W. M. Clark, Warwick Lane. Richard Brook, printer, Huddersfield.

Bindings lightly scuffed, small erasure mark inside cover of both volumes. Though the coloring of the plates is uneven (with some more carefully executed than others), the condition of plates, text, and bindings is very good.

The work is arranged according to the Linnaean system and includes descriptions of the plants in common language with medicinal uses noted. According to information on the wraps, the work was issued in numbers beginning in 1851, each number with 8pp. of letterpress and one plate with six figures. It was issued in both colored and uncolored states. The first six numbers were published individually; thereafter, it was published in double numbers (e.g. "7 & 8," "9 & 10," etc., up to "99 & 100"). 70. Stearn, William T. & Peter H. Davis - *PEONIES OF GREECE. A Taxonomic and Historical Survey of the Genus Paeonia in Greece. Limited edition.* 2 volumes: a bound text volume and a larger portfolio box containing 12 loose individual color lithographs by Niki A. Goulandris, numbered and signed by her. The lithographs measure 26" tall by 20" wide and are housed in a fall-down back box bound in leather and gilt-stamped cloth (9 of the plates are numbered 264/500 and 3 are numbered 251/500, making this a mixed set). The 126pp. text volume by Stearn and Davis is bound in matching leather back and cloth sides, is quarto in format (9.5" wide x 13" tall), and contains reproductions of all 12 of the plates included in the portfolio plus it reproduces 3 other color plates; it also contains 37 b&w figures. This two-volume edition was limited to 500 sets. Published in Kifissia,

Greece 1984. Goulandris Natural History Museum.

This is one of the most complete illustrated works on the subject. The text monograph traces the history of peonies in the Mediterranean from early herbals to modern botanical literature, and describes their morphology, distribution and cultivation in Greece. Niki Goulandris, an accomplished botanical illustrator and philanthropist, was a founder of the Goulandris Natural History Museum in Kifissia, outside Athens. The plates contained in the portfolio were printed by the master lithographic printer Takis Katsoulidis. Each plate was executed using a hand-lithographed color printing process with as many as 15 superimposed colors, giving an effect reminiscent of Japanese woodblock prints. The images, in the best tradition of botanical plates, are both lovely and scientifically accurate. The original prospectus for the work is also included. \$1,800.00
